DETAILED ACTION

Allowable Subject Matter

1. Claims 5-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: The above claims are allowed because the prior art fails to disclose or render obvious the process as recited in claim 5, in which the heat for the steam reforming reaction is provided by convective heat exchange between the steam reformer reactor tubes and one or more passageways positioned within and along the axis of the tubular reactor tubes through which passageway the effluent from the partial oxidization step flows counter-current to the gasses in the steam reformer tubes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Van Dongen et al. (US 2004/04241086) disclose a process for the preparation of hydrogen and carbon monoxide containing gas from a gaseous hydrocarbon feedstock the process comprising partially oxidizing part of the feedstock thereby obtaining a first gaseous mixture of hydrogen and carbon monoxide; and (b)

steam reforming part of the gaseous feedstock in a convective steam reformer comprising a tubular reactor provided with one or more tubes containing a reforming catalyst. Murayama et al. (US 5,112,578) disclose an apparatus and a process for producing reformed gas from gaseous hydrocarbon using a combination of steam reforming process and partial oxidation process.
